CLIMATE CHANGE & HEALTH IN RURAL MOUNTAIN ENVIRONMENTS

The southern Appalachian Mountains are a complex region undergoing rapid changes due to climate change (e.g., more flooding, higher temperatures) and socioeconomic factors (e.g., economic growth) that produce an array of interactions that elevates the health disparities of its population. To date, climate-health research has focused on urban and/or coastal communities. This workshop will identify research needs and priorities for our region at the intersection of climate and health for rural mountain environments. For full details, visit geo.appstate.edu/CCHRME-Workshop.

SPEAKERS

Dr. Brian Byrd

Professor in the Environmental
Health Sciences Program at
Western Carolina University

Allison Crimmins

Director of the National Climate
Assessment for the U.S. Global
Change Research Program

Dr. Kathie Dello

North Carolina State Climatologist
& Director of the North
Carolina State Climate Office

Dr. Maggie Sugg

Associate Professor in the
Department of Geography & Planning
at Appalachian State University

DATE

Friday, April 8th, 2022

LOCATION

Price Lake (201A-B)
Plemmons Student Union
263 Locust St, Boone, NC 28608

REGISTRATION

Lecture Series
(10 AM - 12:30 PM)

Full Workshop
(10 AM - 4 PM)
