

# Geography Internship

Educational objectives:

- Better understand how geographers apply skills and knowledge gained during the college experience in public and private agencies/offices
- Apply computer mapping and GIS techniques
- Apply learned skills and knowledge to practical problems/tasks
- Apply critical thinking skills
- Work effectively and efficiently in small work groups
- Develop oral and written communication skills
- Develop time management skills.

The student will – during the internship – contribute to achievement of the educational objectives by:

- Conducting GIS work, research and preparing schedules, plans and reports relating to task-oriented projects.
- Making oral presentations to supervisor(s) and elected/appointed official(s).
- Attending meetings.
- Meeting deadlines.
- Preparing internship report.
- Reporting weekly to academic advisor via email, telephone or mail.
